The Oyster-Beds of Virginia.

Whilst Congress is engaged during the current winter in devising a practicable scheme for protecting the industries of the whole Union, the Virginia Legislature would do well to originate a law which would protect the cyster-beds of this State from being ruined, or, at least, diminished in productive capacity or yield. Lieutenin productive capacity or yield. Lieutennot Francis Winelow has in the Popular The House met at 12 o'clock—Speaker Solence Monthly for December an article FOWLER in the chair. open the subject of the "Deterioration of American Oyster-Beds" which (article) is well calculated to make oyster-eaters fear standing committees;
Claims: Messrs. Paige (chairman), Cole-

Monres, as follows:

"In North America the oysters are so "In North America the systers are so fite and so cheap that they are eaten daily by all classes; hence they are now, and have been for a long time, a real means of subsistence for the people. " This coviable fact is no argument against the injuriousness of a continuous and severe fisting of the beds. " But as the numhave been for a long time, a real means of subsistence for the people. This cerviable fact is no argument against the injuriousness of a continuous and severe fisting of the beds. But as the number of consumers increases in America, the price will also surely advance, and then there will arise the desire to fish the beds more severely than hitherto, and if beds more severely than hitherto, and if bees more severely than hitherte, and if they do not accept in time the unfortunate experience of the oyster-culturists of Eu-rope, they will surely find their oyster-beds Finance

too still stronger, in his own words; and it is the oyster-beds of Tangier and Pocomote Sound, in Maryland, and Virginia, that he experimented upon. His personal observations convinced him that the beds of Possonals of Possona of Pocomoke Sound were in a condition very similar to the French beds before these were protected by law. And inasthese were protected by law. And insert smith, Lyons, Vaughau, Plaister, Fry, with as France has succeeded in providing a successful method of keeping the Labor and Poor: Messrs. Norton (chairoyster-beds up to their former yield, he very naturally gives some of the features of Nicol, Baldwin, Otiver, Anderson, and oysters is almost incredible. In Europe
the figures were obtained, but they are
quoted as more or less nearly true of the
Virginia oyster-beds. "Where one oyster
arrived at maturity, about 1,185,000 eggs or
oysters perished"! Lieutenant Winslow
cites this fact as an answer to those wiscares
who say that there is no danger of a search
ty of oysters, and tell him how many hundreds of thousands of eggs are spawned by
each oyster. In fact, if Lieutenant Winslow
slow is to be at all relied on, our legislators
